PROFESSIONAL SUMMARY

Data Engineer and Software Engineer with a strong foundation in statistical programming and full-stack web development. Microsoft Certified Fabric Analytics Engineer (DP-600), experienced in designing end-to-end data platforms — medallion Lakehouse architectures, PySpark ingestion and transformation pipelines, and Power BI reporting — alongside scalable Laravel applications. Proven track record of converting manual, spreadsheet-driven reporting into automated, governed data pipelines that power decision-making across HR, education, and finance domains.

PROFESSIONAL EXPERIENCE

Data Engineer & Software Engineer | Zuse Technologies | Jun 2025 – Present

- Design and implement end-to-end medallion Lakehouse architectures (Bronze, Silver, Gold) in Microsoft Fabric to power HR analytics and education performance reporting.
- Build PySpark notebooks and Fabric Data Pipelines to ingest raw Excel/CSV sources into the Bronze layer, handling schema drift, merged cells, and deduplication.
- Perform data cleaning, standardization, and transformation in PySpark notebooks, persisting curated, validated datasets into the Silver layer.
- Develop stored procedures to build fact and dimension tables in the Gold layer, delivering analytics-ready star schemas for Power BI semantic models.
- Automate previously manual monthly reporting workflows through scheduled, orchestrated pipelines, reducing manual effort and improving data reliability and refresh cadence.
- Develop and publish interactive Power BI dashboards (HR attrition, payroll, and education performance) with DAX measures, KPI cards, and drill-down analysis for decision-makers.
- Architected and built a large-scale Budget Management System integrating financial data from SAP, using Laravel, Livewire, and PostgreSQL.
- Create and integrate RESTful APIs, authentication, and access control systems; optimize backend logic and database queries for performance and reliability.

Associate Statistical Programmer | Clindata Pvt Ltd | Mar 2024 – Dec 2025

- Performed exploratory data analysis (EDA) and hypothesis testing to support clinical study results.
- Applied statistical models including linear and mixed models to analyze efficacy and safety data.
- Wrote clean, efficient SAS and SQL code following industry best practices, collaborating with statisticians and data managers to ensure accurate analysis and regulatory compliance.

Junior Associate Statistical Programmer | Clindata Pvt Ltd | Mar 2023 – Mar 2024

- Executed data cleaning, transformation, and quality control to ensure accuracy and regulatory compliance across clinical databases.
- Queried and manipulated clinical databases using SQL and produced tables, listings, and figures (TLFs) to support data reporting and study deliverables.

Associate Software Engineer | Zuse Technologies | Apr 2022 – Mar 2023

- Built modern, responsive web applications using HTML, CSS, JavaScript, and Laravel.
- Developed user-friendly interfaces compatible across devices and integrated backend features for efficient data handling.

KEY PROJECTS

HR Analytics Data Pipeline & Dashboard — [Microsoft Fabric](#), [PySpark](#), [Power BI](#)

End-to-end medallion data pipeline replacing a manual monthly HR reporting workflow. Automated ingestion of updated Excel source files into the Bronze layer (raw data) of a Fabric Lakehouse, applied PySpark-based cleaning and standardization into the Silver layer, and used stored procedures to build fact tables persisted in the Gold layer. The curated Gold data drives a published Power BI dashboard covering headcount, attrition, payroll, and recruitment KPIs — enabling new visuals to be built on fully preprocessed, governed data with every refresh.

SQL Data Warehouse — [SQL Server](#), [T-SQL](#)

Built a data warehouse following the Medallion Architecture (Bronze, Silver, Gold) and developed robust ETL pipelines to extract, clean, standardize, and load CSV data into SQL Server, ensuring efficient and reliable data processing. Implemented data quality checks, deduplication, and consistent naming conventions across layers, and modeled a star schema of fact and dimension tables in the Gold layer for analytics-ready consumption and reporting.

Budget Management System (BMS) — [Laravel](#), [Livewire](#), [PostgreSQL](#), [SAP](#)

Large-scale budget management platform serving the entire Lyceum school network. Integrates financial data sourced from SAP and provides centralized budget planning, allocation tracking, and consolidated reporting across all schools — engineered for scale and reliability with Laravel, Livewire, and a PostgreSQL database.

TECHNICAL SKILLS

Data Engineering	Microsoft Fabric (Lakehouse, Data Pipelines, Notebooks, Dataflows), PySpark, Medallion Architecture, ETL/ELT, Data Modeling (Star Schema), Stored Procedures, Data Quality & Validation
BI & Analytics	Power BI (DAX, Semantic Models, Report Publishing), Statistical Analysis, EDA
Languages	SQL, Python, PHP, DAX, SAS, JavaScript, R
Frameworks	Laravel, Livewire, React, Tailwind CSS, Filament
Databases	PostgreSQL, SQL Server, MySQL, MongoDB
Tools & Cloud	Azure, AWS, Git, Linux, RESTful APIs
Soft Skills	Critical Thinking, Problem-Solving, OOP, Team Collaboration

EDUCATION

BSc Physical Science (Majors: Statistics & Mathematics) | [University of Jaffna](#) • 2018 – 2021

GCE Advanced Level | [R/Ananda Maithriya Central College, Balangoda](#) • 2016

Combined Mathematics (C), Chemistry (C), Physics (S)

CERTIFICATIONS

- **Microsoft Certified: Fabric Analytics Engineer Associate (DP-600)** — Microsoft
- **Microsoft Certified: Fabric Data Engineer Associate (DP-700)** — Microsoft ([In Progress](#))
- R Programming: Advanced Analytics in R for Data Science — Udemy
- R for Statistics and Data Science — Udemy
- Python for Beginners — University of Moratuwa
